- IP digital signage that integrates your CATV systems, public PCs and LCD displays
- Multiple playlists and multiple channels
- Customized templates that feature your logo, colors and layouts
- All-call ticker tape, live weather, clock, image rotation, trivia

Kiosk Central allows organizations to establish digital signage and to distribute video to zones or all network screens simultaneously

Kiosk Central enables MediaCAST to deliver multimedia playlists over the IP network, to any computer or display.

Perhaps a welcome screen and event information to greet people in your lobby or auditorium. Or, daily announcements to every computer in your organization. In a fire drill or actual emergency, you can do an "all-call" over the Internet.

Kiosk Central lets you deliver playlists that include live video, emergency audio, websites, PowerPoints and more. Use your TVs/LCDs with MediaCAST Viewer™ or our Display Stations in your lobbies, auditoriums, hallways and common areas.

It's a great way to deliver professional development materials to a staff lounge or conference room. Playlists can be managed from a Web browser.

Together, MediaCAST and Kiosk Central enable

scalable digital signage and event notification solutions for any size organization.

MediaCAST Playlists in Kiosk Central

Media and content in the MediaCAST digital library can quickly be composed into playlists.

Your playlists can contain a wide range of file formats including live video broadcasts, on-demand streaming video, audio, Flash, PowerPoints, PDFs, Camtasia, Impatica, websites, text, graphics and custom HTML.

Web-based tools allow administrators to manage content, playlists and channels independently. Add your logo and color scheme, a custom background, weather information, ticker tapes and more.

MediaCAST Viewer

Combine Kiosk Central with MediaCAST Viewer to automate announcements and to turn displays on/off immediately or on a schedule.

Reach your users via their PCs, lobby kiosks or displays mounted in hallways, auditoriums, offices and common areas.
