MediaCAST Express is a high-speed hosted solution designed to meet your distance learning and remote access bandwidth needs

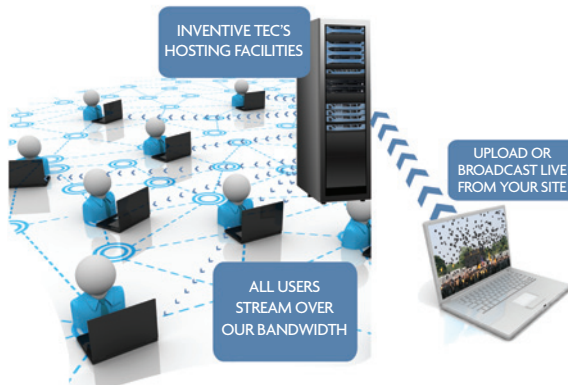

MediaCAST Express is hosted bandwidth that can complement your MediaCAST system, support online learning, or add streaming media to your CMS. It provides access to media tools, storage and delivers audio and video files from any Internet connection, any time.

MediaCAST Express is scalable—you can provide it for a few instructors, a department or a global enterprise. It will host audio and video for your distance-learning program, complete with high-quality streaming for on-demand and live broadcasting. Scalable to deliver the material to thousands of concurrent users and provide thousands of hours of storage.

Our architecture ensures a highly-available, redundant and secure solution. Our hosted bandwidth assures that your audience will have a great user experience, without relying on your bandwidth.
